From vision to implementation

A world where AI helps people resolve their differences, come to better conclusions, and advance in moral maturity.

Avoid/Deter timely disputes by helping participants express their reasoning, and by making it simpler for other stakeholders (including senior partners) to review and comprehend what has been expressed.

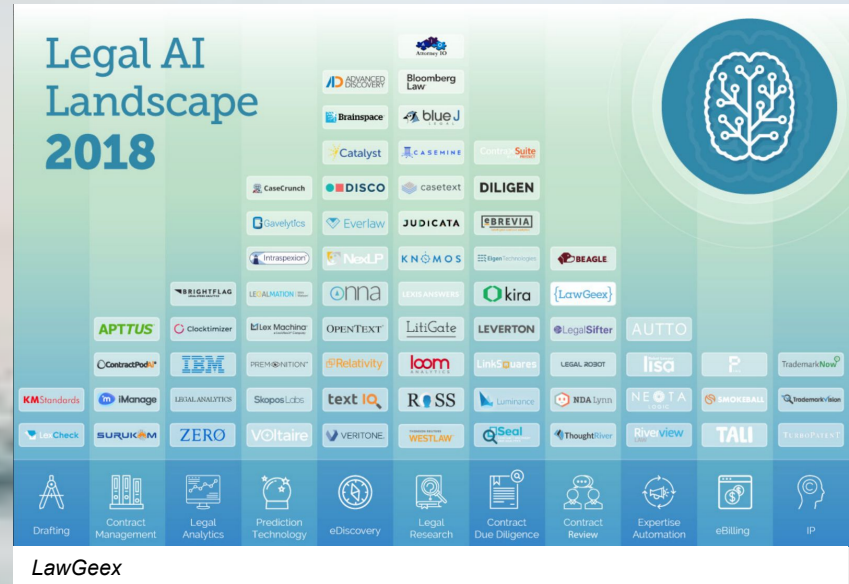

A converging user experience masking siloes in legal tech

User centric: We provide a place where one or more individuals may meet online and have a structured discussion mediated by an AI agent.

Application agnostic/versatile tool

- The path of discussion is documented and conclusions are automatically explainable.
- Discussions are placed in a database and may be used as components in more complex discussions.
- Interface with existing tools/corpus is done automatically in the background

Markets and business model

Legal litigation, mediation, team coordination, firm management, sustaining legal IP

Medical clarification of triage decisions

Insurance inspector reports and preparation for litigation

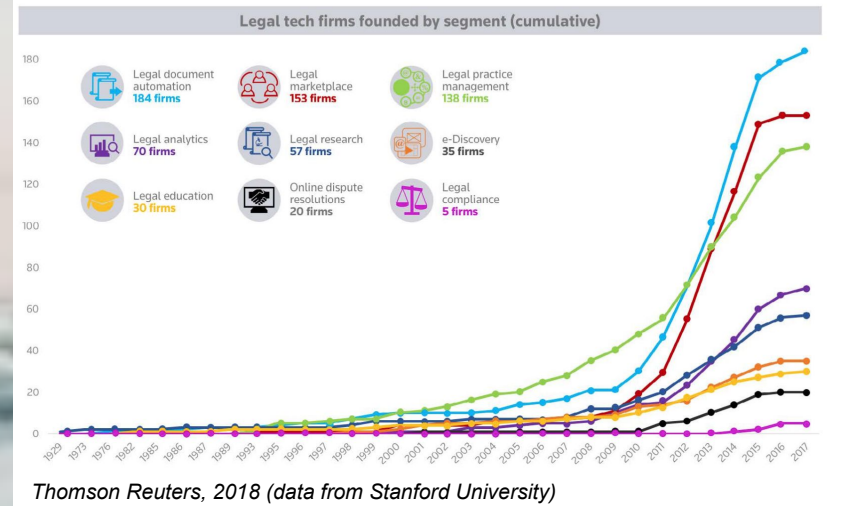

Finance control functions

Software as a Service located

- in the cloud or
- in corporate intranet

People buy subscriptions

Legal tech start-ups are growing in document automation, marketplace, and practice management

Thank You for Consideration

"A goal without a plan is just a wish."
— Antoine de Saint-Exupéry

Our Plan Will Evolve

"It is not the strongest of the species that survives,
nor the most intelligent that survives. It is the one
that is the most adaptable to change."
— Charles Darwin
